Cloud Backup

Keep Your Data Safe, Always and Everywhere

Net Protector Cloud Backup keeps your files and system data safe, accessible and recoverable. Automatic syncing, strong encryption and reliable cloud storage protect your information from hardware failure, accidental deletion and cyber threats, so it is always there when you need it back.

Automatic backup

Regular backups run on their own, reducing manual effort and keeping your data protected consistently and reliably.

Encrypted & private

Your cloud backups are secured with strong encryption, so your data stays safe and accessible only to authorised users.

Compressed & incremental

Data is compressed and only the changes since the last backup are sent, saving storage space and speeding up every backup.

Restore to any PC or laptop

Restore your cloud backups to any PC or laptop, at home or in the office, for fast and hassle-free access to important data.

Protection from disk failure

If a hard disk fails, your data is already stored securely in the cloud and ready to restore, so your work can carry on.
